

CLAIMS

What I claim is:

- 1 1. An organizer cover, comprising:
2 first and second cover panels and a spine operatively
3 coupled between said first and said second cover panels, said
4 first and said second cover panels and said spine each having an
5 exterior;
6 an external surface which includes the exteriors of
7 said first and said second cover panels and of said spine;
8 an organizer element located on said external surface;
9 and
10 a concealment flap connected to said external surface
11 and manually positionable between a closed position against said
12 external surface and an open position, said flap being located
13 and configured to conceal, at least in part, said organizer
14 element when said flap is in the closed position,
15 wherein neither said external surface nor said
16 organizer element includes thereon a means for securing said
17 concealment flap in the closed position.
- 1 2. The organizer cover of claim 1, wherein said
2 concealment flap includes external and internal surfaces, and
3 wherein neither the external nor the internal surface of said
4 flap includes thereon a means for securing said flap in the
5 closed position.
- 1 3. The organizer cover of claim 1, wherein said
2 concealment flap includes an internal surface, said flap
3 containing a plurality of card pockets in the internal surface
4 of said flap.

1 4. The organizer cover of claim 1, wherein said
2 concealment flap includes an internal surface, said flap
3 containing a mirror on the internal surface of said flap.

1 5. The organizer cover of claim 1, wherein said
2 concealment flap includes an internal surface, said flap
3 including a pen loop on the internal surface of said flap.

1 6. The organizer cover of claim 1, wherein said
2 concealment flap contains a storage pouch.

1 7. The organizer cover of claim 6, wherein said
2 concealment flap includes external and internal surfaces, and
3 wherein the storage pouch contains an opening through the
4 external surface of said flap.

1 8. The organizer cover of claim 7, wherein the storage
2 pouch includes a zipper closure for closing the opening of the
3 pouch.

1 9. The organizer cover of claim 1, further comprising
2 closure means for securing said first and said second cover
3 panels together.

1 10. The organizer cover of claim 1, wherein said organizer
2 element is a pouch.

1 11. The organizer cover of claim 1, wherein said organizer
2 element is at least one slot contained in said front cover
3 panel.

1 12. The organizer cover of claim 1, wherein said organizer
2 element is a pocket.

1 13. An organizer cover comprising:

2 first and second cover panels and a spine operatively
3 coupled between said first and said second cover panels, said
4 first and said second cover panels and said spine each having an
5 exterior;

6 an external surface which includes the exteriors of
7 said first and said second cover panels and of said spine;

8 an organizer element located on the exterior of said
9 first cover panel; and

10 a concealment flap connected to said second cover
11 panel, said flap being manually positionable between a closed
12 position against said external surface and an open position,
13 said flap extending around said spine and over at least a
14 portion of said first cover panel when said flap is in the
15 closed position, such that said flap conceals, at least in part,
16 said organizer element,

17 wherein neither said external surface nor said organizer
18 element includes thereon a means for securing said concealment
19 flap in the closed position.

1 14. The organizer cover of claim 13, wherein said
2 concealment flap includes external and internal surfaces, said
3 flap including a pen loop on the internal surface of said flap.

1 15. The organizer cover of claim 14, wherein the pen loop
2 is located adjacent said spine, and wherein an annular space is
3 defined between said spine and the internal surface of said flap
4 when said flap is in the closed position, the annular space

5 being dimensioned to provide some clearance for a writing
6 implement inserted in the pen loop.

1 16. An organizer cover comprising:

2 first and second cover panels and a spine operatively
3 coupled between said first and said second cover panels, said
4 first and said second cover panels and said spine each having an
5 exterior;

6 an external surface which includes the exteriors of
7 said first and said second cover panels and of said spine;

8 an organizer element located on the exterior of said
9 first cover panel; and

10 first and second concealment flaps connected to said
11 external surface, said first and said second flaps being
12 manually positionable between closed positions against said
13 external surface and open positions, said first and said second
14 flaps each being located and configured to overlap a portion of
15 the exterior of said first cover panel and, together, being
16 configured to substantially conceal said organizer element,

17 wherein neither said external surface nor said
18 organizer element includes thereon a means for securing said
19 first and said second concealment flaps in the closed position.

1 17. The organizer cover of claim 16, wherein said first
2 and said second flaps being configured to overlap and conceal
3 complementary portions of the exterior of said first cover
4 panel.
